Egyptian Maintenance Company

A case study by:

Khaled Galal

Iraq Branch manager

Egyptian Maintenance Company

“Egyptian Maintenance Company (EMC) currently use Mesopotamian Eagles Security (MES) on our Basra Gas Company compliant (Shell Gas) project.

We have initially awarded the contract to MES for 12 months and in this first phase MES will provide both physical security and consultancy services, including the provision of a Security Manager whilst we recruit our own in house and the provision of armoured movement assets in the Basra area. Mes’ Security Manager has been involved in this project from the outset, liaising directly with Shell Gas on EMC’s behalf and has been crucial in EMC being successful in winning the project.

MES also provide EMC with two movement Armed Protection Teams (APTs) in support of our services to ENI.

Lastly we utilise MES’ services to provide us with static guard services for our main camp in zubair and our villa in the city.

The service we have received from MES has been second to none, they are always responsive and very attentive to our needs. On every project they are reliable and consistently deliver high quality services, on time and as required. They worked closely with us during our tender for the Basra Gas company contract, never letting us down and always exceeding our expectations. They were proactive and committed to the project throughout.”
