## Case Study

### Halliburton

A case study by:  
Daniel Thornton  
**Country Branch Manager**  
**Halliburton**

“Mesopotamian Eagles Security (MES) are currently supporting Halliburton on various projects in Southern Iraq.

We utilise their services to provide static guards covering three of our work rigs; a storage yard in the Basra area and two work-over rigs in Badra on the Iranian border. At one stage MES were providing Halliburton with over 280 guards, all of whom were reliable and proficient for their entire time spent on the project.

MES are also supporting us with two Rig Site Security Managers who are co-located on our Iraqi Drilling Rigs to provide 24/7 site security oversight; assessment; and incident reporting.

MES currently provides ROO compliant mobile guards to secure Halliburton equipment, remaining overnight at our exploration sites and well pads in Rumaila in order to prevent and deter theft. They have also supported us with various ad-hoc Armed Protection Teams.

Finally, MES also assist with the logistical re-location and establishing of our physical security equipment profiles, as we move from one rig site to another (approximately every 35-45 days).

We have worked with MES since 2012 and they consistently provide an exceptional client service on every project. They are committed to understanding our needs and delivering on time with staff that are fully proficient, attentive and professional at all times. We would certainly recommend their services.”
